

SABASTIAN BENAVIDEZ

(505) 480-7298 Sebastian.j.Benavidez@gmail.com Albuquerque, NM Active U.S. Top Secret Clearance

PROFESSIONAL SUMMARY

Cyber-focused Data Analyst and MBA (Finance/Operations) with an Active Top Secret Clearance and 5+ years of experience in technical system oversight, quantitative modeling, and federal process optimization. Expert in leveraging Python, R, and advanced Excel to monitor digital integrity and drive data-informed decisions in high-stakes environments (DCSA). Adept at gathering functional requirements for AI implementations and bridging the gap between complex datasets and operational security outcomes.

WORK EXPERIENCE

Defense Counterintelligence and Security Agency (DCSA)

June 2025 - Present

Cyber-Technical System Liaison (GS-07)

- Monitor digital enhancement and optimization processes for federal background investigation workflows, ensuring 100% operational integrity and data security.
- Research and gather functional requirements for generative AI implementations, focusing on anomaly detection and digital threat mitigation strategies.
- Utilize analytical principles to identify process gaps and technical vulnerabilities, driving efficiencies that support strict federal compliance guidelines.

Freelance Consulting

2016 - 2020

Technical Project Manager (Data Operations)

- Directed end-to-end data and media production lifecycles, focusing on resource optimization, system integration, and secure distribution strategies.
- Designed and deployed operational workflows for content distribution, reducing lead times by 25% while enhancing deliverable quality and data integrity.
- Integrated cross-functional creative, technical, and business requirements to provide actionable strategic recommendations for system enhancements.

Kelly Education

January 2025 - June 2025

Operations Coordinator

- Managed stakeholder expectations and guided diverse groups of 30+ individuals daily, demonstrating the "persuasion and motivation" required for institution-wide adoption of new protocols.

SKILLS & COMPETENCIES

Technical: Python, R, SQL, Quantitative Modeling, Advanced Excel (Macros, Pivot Tables).

Analysis: Anomaly Detection, Data Integrity Monitoring, Requirement Gathering, Process Optimization.

Security: Active Top Secret Clearance, Federal Policy Compliance, System Implementation Strategy.

EDUCATION

MBA in Finance & Operations (GPA: 4.16) - University of New Mexico

B.S. Business Administration (GPA: 4.18) - University of New Mexico
